Summary

Computer Science undergraduate (B.Tech, Expected Graduation: 2027) with hands-on experience across the full software development lifecycle — from API design and implementation to testing, deployment, and cross-team collaboration. Proficient in Java, Python, and JavaScript, with a strong foundation in data structures, algorithms, and object-oriented programming, and a track record of quickly picking up new languages and tools as projects demand. Built and deployed multiple production-style applications spanning the MERN stack, machine learning, and AI-powered features. Motivated by real-world problem solving, continuous learning, and contributing to high-quality, collaborative software development teams.

Professional Experience

Backend Developer, *CodeWaveSolution* 🔗

01/2026 – 06/2026
Bhopal

- Designed and deployed RESTful APIs using Node.js, Express.js, and MongoDB to power an EdTech platform serving online and offline coding courses for 1,000+ users
- Implemented multi-layered authentication and role-based access control, reducing security incidents and improving system reliability
- Integrated third-party services (email delivery, authentication) and maintained 99%+ uptime via structured error handling and logging.
- Collaborated with frontend engineers on a React.js + Tailwind CSS interface, establishing shared API contracts and cutting integration defects by 40%

Projects

DevDrop 🔗, *MERN · Supabase · Razorpay · Brevo API · Google OAuth*

- Engineered a full-stack marketplace for buying and selling web templates, supporting real-time auction mechanics, admin approval workflows, and multi-role access (buyer / seller / admin)
- Designed a distributed payment and verification pipeline (Razorpay + automated email workflows) that eliminated 80% of manual admin overhead for seller payouts
- Implemented intelligent sub-category filtering (Free / Paid / Exclusive) and inline auction modal with live countdown, demonstrating complex state management and concurrent UI updates.
- Explored programmatic end-to-end deployment (Vercel / Render / Supabase APIs) to auto-deploy purchased templates, reducing buyer time-to-live from hours to minutes
- GitHub: github.com/RitikPuranik/DevDrop 🔗

ResumeAI 🔗, *MERN · Groq · Razorpay · Cloudinary*

- Developed a full-stack AI career platform (MERN) that automates ATS-optimized resume and cover letter creation, utilizing Google Gemini and Groq LLMs to instantly process user data into professional formatting.
- Engineered a real-time interactive mock interview module, delivering instant, AI-driven candidate performance evaluations and actionable feedback by integrating speech processing
- Architected a secure, highly performant application handling robust JWT authentication and Razorpay subscriptions and optimizing client-side asynchronous data fetching
- GitHub: github.com/RitikPuranik/ResumeAI 🔗

FoodGram 🔗, *MERN · ImageKit · REST API*

- Architected and developed a full-stack social media platform with editorial dark UI, Cormorant Garamond typography, and Axios powered REST API.
- Engineered a scalable media delivery and interaction backend by integrating ImageKit for optimized video/image hosting, and designing complex NoSQL schemas to support robust relational features including user followers, dynamic feed generation and nested comments
- GitHub: github.com/RitikPuranik/FoodGram 🔗

Technical Skills

- Languages:** Java, Python, JavaScript
- Frontend:** HTML, CSS, JavaScript, React.js, Tailwind CSS
- Distributed Systems & Backend:** Node.js, Express.js, REST API design, MongoDB
- Platforms:** VS Code, AntiGravity, Postman
- Cloud & DevOps:** Docker, Git, GitHub, AWS
- AI / ML:** Python(Numpy, Pandas, Matplotlib, Seaborn), ML
- Algorithms & Problem Solving:** Binary Search, Sliding Window, Binary Tree, Dynamic Programming, Linked List, Stack & Queues, Greedy Algorithm(LeetCode - JAVA)

Achievements and Certifications

- LeetCode** — Global rank under 100k | 700+ questions solved
- Amazon Web Services (AWS)** — AWS Cloud Practitioner
- Oracle Academy** — Database Foundation

Education

B. Tech - Computer Science, *Gyan Ganga Institute of Technology and Sciences, Jabalpur*
CGPA: 7.68

2023 – 2027

Higher Secondary Education, *St. Gabriel's Senior Secondary School*

2010 – 2022

- Class 10th, CBSE Board, Percentage: 78.50%
- Class 12th (PCM), CBSE Board, Percentage: 80.17%
